Clarification No. 1 of the Prequalification Documents			Description whether the answer is a clarification or an amendment
No.	Question	Answer	
1.	PDS ITA 17.1 part of the Invitation for PQ Document stated “documents should be properly signed and scanned copies shall be included in the pdf file” and “application should be prepared as one pdf document, password protected and submitted through the WeTransfer service”. As we understand from the statements, electronic signature is not a requirement during submission. Wet signed original documents can be scanned and combined into single pdf file. Then, document transfer will be made via WeTransfer service with password protection. Could you please confirm that electronic signature is not a requirement and scanned copies of the original documents are acceptable in PQ tender submission?	<p>We confirm electronic signature is not a requirement, and scanned copies of the original documents are acceptable.</p> <p>In addition, we do want to emphasize that this same paragraph states the following: “Original documents in hard copy may be requested by the Employer before prequalification of the Applicant.” indicating that Applicants should safekeep the hard copy of the Application in case the Employer requests original documents in hard copy before completion of the prequalification process.</p>	Clarification
